DETAILED ACTION

- The Examiner has carefully considered Applicants' amendments and remarks filled on 12/1/2003. Applicants' amendments to claims 1, 31 and 38, and cancellation of claims 2, 6, 7 and 30 have been entered.
- The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Rejections not maintained are withdrawn. In particular, Applicants' amendments and arguments with respect to the rejection of claims 1-7 under 35 U.S.C. 102(b), and 29-36 and 38 under 35 U.S.C. 103(a), both over Park et al. (US 4756462) alone, have been fully considered and are persuasive. However, Applicants' arguments are moot in view of the new grounds of rejection made over Park et al. in view of Baird (US 5006394).

Response to Amendment

4. Claims 1, 3-5, 29, 31-36 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Park et al. (US 4758462) in view of Baird (US 5006394), substantially for the reasons set forth in sections 5 and 6 of Paper No. 0819, together with the following additional observations.

It is noted that newly amended claims 1, 31 and 38 now recites in part "wherein each layer of said film is substantially free of voids" with support in the Specification, at pages 16-17, bridging paragraph, which states "it is possible to form an opaque core Application/Control Number: 09/757,175 Art Unit: 1771

layer 14 that is substantially free of voids where the opacity is achieved by the addition of opacifying compounds".

With respect to Applicants' response arguing that "Park does not disclose a film ... wherein each layer of the film is substantially free of voids" (Remarks, page 10, fifth paragraph), the Examiner notes that although Park is sient about forming an opaque core layer which is substantially free of voids, it is noted that Baird's invention is directed to a polymeric multilayer film having a high percentage of fillers to increase opacity (Abstract and column 1, lines 11-14)). Baird teaches that a substantially void-free polymeric multilayer film which exhibits an opaque appearance without being stretched, the film comprises a core layer which contains about 15 to about 60 weight percent fillers substantially uniformly dispersed therein (column 8, lines 39-65). Further, Baird teaches that the prior art of multilayered opaque film requires stretching of the film to provide opacity, which adds a step to the manufacturing process and increased cost (column 1, lines 41-43). As such, it would have been obvious to one of ordinary skill in the art to modify Park's core layer with Baird's void free opaque core layer, motivated by the desire to reduce the manufacturing cost.

Applicant's amendment necessitated the new ground(s) of rejection presented in
this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP
§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37
CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 09/757,175

Art Unit: 1771

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor S Chang whose telephone number is 571-272-1474. The examiner can normally be reached on 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel H Morris can be reached on 571-272-1478. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-0994.
